

DEBAR

VISOFOOLD

DEBAR

VISOFOOLD 1000 HARDWARE

Main Features

- Stainless steel wheels with sealed in bearings for smooth and even operation
- Roller axles on a gimbal to maintain even load distribution across all four wheels when opening and closing doors
- Roller and guide assembly designed to a minimum of 100KG per panel (120KG subject to cycle testing)
- Roller and guide bodies designed for achieving PAS 24 security test without the need to encapsulate within the profile. No machining of track for roller/guide entry points
- Hinges, rollers, guides and shoot bolts all designed to PAS 24 as standard
- Shoot bolt ends which do not damage the profiles
- Visofold 1000 door testing to same standards as Smarts systems most recent 2017 test, but with Debar hinges, rollers, guides, shoot bolt lock/rods/handle & steel running rails, enabling the Debar certificate to be cascaded
- Extremely cost competitive due to Debar manufacture and supply of the majority of items
- In house quality controls to ISO 9001: 2017
- In house manufacturing ensures stock level fluctuations can be maintained
